

Quality Policy

1.4 Quality policy

Our Mission Statement:

PCR BIOSYSTEMS Ltd. strives to be a leading manufacturer of kits and reagents for scientists and end-users working in the field of molecular biology research and diagnostics by maintaining the highest level of integrity, professionalism, innovation, and competitive pricing for our clients.

Our Quality Policy:

PCR BIOSYSTEMS Ltd. wishes to fulfil its mission by applying progressive management principles and an effective quality management system.

The main goals of our quality-related activities are the following:

- Achieving professionalism in the selection and the development of our staff; maintaining a wide range of credentials and qualifications;
- Innovation in everything we do;
- Cost-effectiveness and efficiency both in our operations and in our services, passing on the benefits to our clients;
- Continuously aim to achieve and go beyond customer requirements;
- Investment in research and development to bring innovative, high performing products to market;

In order to achieve these objectives, we implemented a Quality Management System in accordance with the requirements of the ISO 9001:2015 and ISO 13485:2016 international standards. We are committed to comply with legal and other requirements and to improve continuously our QMS and to maintain the effectiveness of our QMS which is an ongoing task that shall be incorporated in the activities of all the members our staff.]
